NEW STATE REQUIREMENT FOR DISPOSING OF ELECTRONICS

Wisconsin’s approved electronics recycling bill establishes a collection and recycling system for certain electronics devices discarded by households. The attached sheet provides:

- Increased and convenient access to responsible electronics recycling.
- Easy access to information on which electronics devices must be recycled, where and how to recycle.
- Consumers will not be able to dispose of many household electronic devices in landfills or incinerators in Wisconsin after Sept. 1, 2010. It is also illegal to dump, burn or bury these devices, so households will need to recycle them.

The following are just a few items that should be recycled. The locations listed are near Waterford. For a complete list of locations please visit www.uwex.edu/ces/ - Racine County's Recycling Guide. Click Racine County; then click "Watch Your Waste".
